

California OES Weather Threat Briefing

Thursday, March 11, 2021
9:00 AM PST

Day 1 (Thursday): Periods of showers, mountain snow, and isolated thunderstorms will continue today, especially over southern California and along the Sierra. Snow levels will remain low, mainly either side of 3,000 feet, with some localized flash flooding possible near southern California burn scars during any heavier rainfall rates in thunderstorms.

WEATHER KEY POINTS

03/11/21 - 03/17/21

Thursday-Wednesday

- Unsettled weather continues today into Friday, with periods of showers, mountain snow, and thunderstorms, particularly across the Sierra and much of southern California
 - Snow levels remain quite low for mid March, generally between 2,500 and 3,500 feet, with some travel impacts expected above these levels from snow
 - Brief periods of heavier rainfall in and near any thunderstorms will bring the potential for some flash flooding over southern California, mainly near the Bond and Silverado burn scars
 - Small hail is also likely with any stronger thunderstorms today
- Drier weather returns briefly on Saturday, with rain and mountain snow returning to much of northern and central California Saturday night through Monday night. Some precipitation also possible over southern California on Monday.
 - Snow levels start out higher around 4,000-5,000 feet Sunday but may again lower to 2,500 to 3,500 feet Monday for northern and central portions of the state,
